About me

Highly motivated with a wide range of interests and skills in IT. Effectively apply innovative approaches to tasks. Easily find a common language with colleagues. I adapt flexibly to changes, successfully solve complex problems and find new ways to achieve goals.

Technical Skills

JavaScript, Vue.js, Nuxt3.js, Html, Css, Scss, Sass, DevTools, Git, JSON, Vue Formulate, React, Gulp, TypeScript, JQuery, Json-server, Routing, Moment, Docker, Docker-compose, Bootstrap.

English – Pre-Intermediate.

Experience

Javascript Developer at BasuCompany

March 2024 - December 2024

Frontend JavaScript developer with experience in projects using the **Vue.js** and **Nuxt 3** frameworks. Took part in the initial stages of the project—developing its architecture, creating components, and integrating with APIs. Collaborated closely with backend developers and designers to ensure smooth communication and improve project quality.

Responsibilities:

- Project structure creation
- Developing page layouts and styles
- Selecting and installing necessary packages
- Building universal components
- Working on page localization
- Connecting to APIs
- Fixing bugs
- Refactoring pages

Achievements:

- Created a project and documentation to support the work of other developers.
- Quickly learned **Nuxt 3** and its additional libraries.

Frontend JavaScript developer with experience in a project using the **Vue.js** framework and Docker, I also actively used the bootstrap library and the Scss preprocessor. Worked closely with the team. Actively involved in improving the quality of the project.

Responsibilities:

- Creating Vue Components
- Creating an HTML structure
- Styling and adaptation of components
- Connecting routes for components
- Creating pop-up windows for a project
- Fix bugs in the system
- Writing a variety of methods based on the tasks

Achievements:

The first project is to create a responsive design using JSON test data, ensuring correct functionality with any customer data. Worked independently on components with dynamic designs across pages, minimizing changes to JSON to save memory.

- I completed the task ahead of schedule, allowing me to assist colleagues.
- I completed the task using various Vue tools while expanding functionality without affecting existing features, adhering to the Open–Closed principle.

The second project worked on a website builder using solutions from my first project.

- Creating Wiki Documentation in GitTea
- Bug fixes
- Adding new functionality: search, filters, pop-ups, server requests, routing, pagination and more.

Completed tasks ahead of schedule, allowing me to take on data processing tasks and gain valuable experience.

Education

Odessa Polytechnic National University**2017 – 2021**

Computer Engineering Bachelor – Institute of Computer Information Technologies

Udemy courses:
